

Tim the Computer Wizard Newsletter

November 2013

Viruses/Infections being left alone

Like brakes on a car, computers do not fix themselves. They only get worse. Enough said.

Emails from USPS, FedEx Tracking (or similar)

Unless you signed up for email notifications on an expected delivery, these emails are loaded with infections. DO NOT OPEN THEM. Go to the shipper's website and track your packages.

Read & Understand BEFORE you click

Or call me and read it to me. If you randomly click without reading/understanding what you click on, you will pick up infections.
